

## ODF Fire Report: Friday, Sept. 18, 2020

### Oregon Activity Summary

We are closely monitoring **10** major fires in Oregon, (see table below for details). Echo Mountain and the North Cascade complexes were removed from today's report. Fires are removed from the list when they are 100% lined and fire managers are confident in their progress toward containment. There are more than 6,500 personnel assigned to these fires from across the nation and Canada. This doesn't include the many government emergency response employees, landowners, forestland operators, and members of the community who are contributing to the fight in whatever way they can. About **1 million acres** have burned in Oregon since the start of this year, which is **nearly double the 10-year average** of approximately 557,811.

Fire name	Acres burned (est.)	Containment	Location
Lionshead	192,719	10%	20 miles W of Warm Springs
Beachie Creek	192,012	20%	15 miles N of Detroit
Holiday Farm	172,510	10%	3 miles W of McKenzie Bridge
Riverside	137,865	10%	2 miles SE of Estacada
Archie Creek	130,429	25%	20 miles E of Glide
Brattain	44,800	20%	8 miles S of Paisley
Slater	41,395 in Oregon	10%	SE of Cave Junction (also in No. California)
S. Obenchain	32,833	35%	5 miles E of Eagle Point
Two Four Two	14,473	37%	W/NW of Chiloquin
Thielsen	9,995	15%	E of Diamond Lake

**Please note:** The acres burned estimates above are based very limited information available. These numbers will change over the next several days, in some cases significantly. We will be taking every opportunity to map these fires. Fire maps are an important tool for both ongoing response operations and keeping people informed.
